PARTNER INFORMATION FORM

PsychoDigital Lab by Tiziano Costanzo | Erasmus+ and EU-funded Projects

1. Application Partner

Organisation ID (OID)	E10403819
EU Funding & Tenders Portal – Participant Identification Code (PIC)	863728838
Full legal name	Tiziano COSTANZO
Professional profile	PsychoDigital Lab - independent multidisciplinary project lab for European cooperation, innovation, training and digital-human transformation
Legal status	Autónomo / independent professional registered in Spain - Canary Islands
National / fiscal ID	Available upon request or where required by the coordinator/application form
Country	Spain
Region	Las Palmas
City	Puerto del Rosario
Address	Calle Candelaria del Castillo 28 - Puerto del Rosario, Canary Islands, Spain
Website	lab.psychodigital.eu
Email	cooperation@psychodigital.eu
Telephone	+34 641123698 (ES) +39 3407695740 (IT)
Main working areas	Applied psychology, school education, adult learning, tourism psychology, digital wellbeing, privacy and data protection, cybersecurity awareness, AI literacy, immersive technologies, governance and decision-making

2. Contact Person and Operational Role

Contact person	Dr. Tiziano Costanzo (t.costanzo@psychodigital.eu)
Role	Founder and Lead Expert of PsychoDigital Lab for European Project Cooperation and Digital-Human Innovation
Contact person	Dr. Chandra Massetti (c.massetti@psychodigital.eu)
Role	Head of Psychology for European Projects and expert in psychological assessment and behavioural methodologies
Main language	Italian - native
Other working languages	Spanish - professional working proficiency; English - working proficiency for project cooperation and written documentation
Cooperation model	Independent multidisciplinary project lab, external expert, consultant, specialised contributor or partner profile, depending on the call architecture and the coordinator's requirements
Availability model	Remote, hybrid and on-site participation for meetings, training activities, project outputs, piloting, dissemination and stakeholder engagement

3. Brief Profile

Based in the Canary Islands, Spain, PsychoDigital Lab is an independent multidisciplinary project lab that connects applied psychology, digital wellbeing, privacy, data protection, cybersecurity awareness, artificial intelligence, immersive technologies, school and adult education, tourism psychology, governance, training and decision-making. Its distinctive value lies in translating human-centred and digital expertise into practical, transferable and impact-oriented project outputs.

The Lab is led by Tiziano Costanzo and builds on more than twenty years of experience across ICT, research and development, governance, project management, data protection, cybersecurity, training and applied psychology. It is supported by an established network of collaborators with years of experience in psychology, education, digital technologies, organisational development and European cooperation. The Canary Islands offer a favourable context for projects on sustainable tourism, wellbeing, hospitality, digital transition and professional training.

4. Core Workstreams and Project Contribution

Workstream	Relevant expertise	Possible contribution to projects
School education and adult learning	Teaching, training design, psychoeducational approach, school-based awareness and adult capacity building.	Training modules, teacher training, workshops, learning resources, educational toolkits and train-the-trainer activities.
Tourism psychology and territorial innovation	Tourism psychology, visitor experience, wellbeing, community impact, hospitality dynamics and Canary Islands territorial context.	Projects on sustainable tourism, wellbeing-oriented destinations, training for tourism operators, resident-tourist relations and digital innovation in tourism.
Digital wellbeing and technology-mediated behaviour	Responsible use of digital technologies, social media effects, digital identity, youth protection, family and school guidance.	Guidelines, lesson plans, awareness campaigns, prevention-oriented materials and tools for schools, families, professionals and communities.
Privacy, GDPR and data protection culture	DPO expertise, GDPR compliance, privacy by design and by default, data governance, DPIA, accountability and data subject rights.	Privacy-aware project design, ethical handling of participant data, training on data protection and contribution to governance models.
Cybersecurity awareness and human factor	Cybersecurity governance, CISO perspective, NIS2 awareness, security culture, human factor in cyber risk and organisational resilience.	Cyber-awareness modules, practical checklists, staff training, risk culture activities and cybersecurity integration in education or organisational projects.
AI literacy and immersive technologies	Artificial intelligence literacy, virtual and augmented reality, ICT governance, technology adoption and human-centred innovation.	Content on AI literacy, immersive learning, ethical use of digital tools, simulation-based training and responsible adoption of emerging technologies.
Governance and decision-making	Organisational governance, project management, business process analysis, decision-making in complex contexts and impact logic.	Needs analysis, project design, work package logic, quality processes, indicators, monitoring frameworks and remediation-oriented reporting.

5. Experience Underpinning the Lab

PsychoDigital Lab builds on the professional experience developed by Tiziano Costanzo through external expert contributions. Relevant Erasmus+ environments include DigiWell (KA220-VET-000088097), Changing Lives (KA210-SCH-000173669) and VR SEN (KA220-SCH-000174004). This background supports practical familiarity with KA220-VET, KA210-SCH and KA220-SCH, particularly in digital wellbeing, school innovation, vocational education, inclusion, immersive technologies and impact-oriented training outputs.

The Lab also draws on experience in research and development, ICT governance, organisational processes, privacy, cybersecurity, training and applied psychology. This combination supports both conceptual design and operational implementation, with outputs usable by schools, professionals, organisations, tourism stakeholders and community actors.

6. Professional Network and Implementation Capacity

PsychoDigital Lab is supported by an established multidisciplinary network of collaborators with years of experience in psychology, education, training, digital technologies, privacy, cybersecurity, organisational development, communication and applied innovation. This network can strengthen activities requiring specialised expertise, field implementation, content development, training delivery, dissemination and impact-oriented actions. Collaborators are involved only when the project design, role allocation, budget and contractual framework make their participation necessary and sustainable.

7. Suggested Project Lines

Project line	Relevance for Erasmus+ and EU-funded projects
Digital wellbeing and school innovation	Healthy digital habits, social media awareness, digital identity, family and teacher guidance, youth protection and media education.
AI literacy and human-centred innovation	Understanding artificial intelligence, its risks, opportunities and impact on learning, work, decision-making and organisational life.
Tourism psychology and sustainable destination development	Wellbeing-oriented tourism, hospitality training, resident-tourist relations, inclusive visitor experience and innovation in destination ecosystems, with the Canary Islands as a favourable context.
Privacy, cybersecurity and responsible digital culture	GDPR awareness, ethical data handling, cybersecurity culture, human factor in digital risk and responsible use of participant data.
Immersive learning and psychological wellbeing	Virtual and augmented reality, simulation-based learning, training environments, anxiety or phobia-related applications and responsible adoption of immersive tools.
Governance and decision-making in complex contexts	Evidence-informed decision-making, process analysis, impact indicators, quality assurance, strategic alignment and organisational transformation.

8. Relevance for Project Consortia

PsychoDigital Lab is relevant when a project needs to connect innovation, education, human behaviour, digital responsibility and territorial impact. Its integrated workstreams create strong potential for initiatives addressed to students, teachers, trainers, tourism operators, public bodies, private organisations, third-sector entities and professional communities.

9. Infrastructure and Operational Resources

The operational base of PsychoDigital Lab in the Canary Islands supports remote and hybrid cooperation with European partners and provides a meaningful territorial setting for projects linked to tourism, sustainability, wellbeing, digital transition and professional training. Project work is supported by digital collaboration tools, professional writing and content production capacity, stakeholder-oriented communication, training design, privacy-aware project management and access to an established network of collaborators where formally agreed with the coordinator.

10. Proposed Partner Description for Application Forms

PsychoDigital Lab is an independent multidisciplinary project lab based in the Canary Islands, Spain. It integrates applied psychology, digital wellbeing, privacy, data protection, cybersecurity awareness, artificial intelligence, immersive technologies, tourism psychology, school and adult education, governance, training and decision-making. The Lab builds on external expert experience in Erasmus+ project environments and is supported by a network of collaborators with years of professional experience. Within a project, it can contribute to needs analysis, methodological design, educational content development, training, quality assurance, impact assessment, dissemination and stakeholder engagement. Formal participation is carried out through Tiziano Costanzo's registered status as an independent professional in Spain.

11. Administrative Notes and Declaration

OID	E10403819
EU Funding & Tenders Portal – Participant Identification Code (PIC)	863728838
Legal status	Autónomo / independent professional based in Spain, Canary Islands
Use of OID and PIC	The OID, PIC and partner profile may be used for a specific proposal only after explicit consent, verification of eligibility and prior agreement on role, activities, budget and contractual framework.
External collaborators	External collaborators will be involved through PsychoDigital Lab only when formally agreed in the project structure, budget and contractual framework.
